

## Most Advanced Performance

Based on 30 years of experience in laser light scattering, Brookhaven Instruments Corp. introduces the highly integrated **particle size** and **zeta potential** analyzer using the industry's only true PALS technology for extreme low electrophoretic mobility measurements down to 0.001 mobility unit.

Our goal is to help best utilize modern technology for your specific applications.

## Features at a Glance

- ◆ Three way re-configurable, compact unit
- ◆ Extreme low cost of ownership
- ◆ Enhanced temperature range -05 °C to +110 °C
- ◆ High powered laser
- ◆ Two available scattering angles
- ◆ Molecular weight determination
- ◆ The industry's most advanced software with DLS, ELS and PALS integration

■ Outstanding Technology

■ Extensive Knowledge

■ Individualized Service
